

# Software Engineer @ TigerWorks

TigerWorks (<http://thetigerworks.com/>) is developing a vertically integrated SAAS platform for software development. It provides one stop solution for code hosting, reviewing, testing, deployment and monitoring. We are looking for talented, highly motivated software engineers to build our MVP. You will be working from our office at Uttara, Dhaka.

## **Reasons to work at TigerWorks:**

- Opportunity to work with engineers who have worked at places like Google & Amazon.
- An exciting place to work! Your ideas can make a difference to the world.
- Work on engineering projects which are much more fun and challenging than typical CRUD applications.

## **Opportunities: Full-time Software Engineer**

## **Responsibilities**

- Build and own the system architecture and continuously work on ensuring its scalability.
- Work with a diverse stack of open source technologies (PostgreSQL, ElasticSearch, Redis, Docker, Graphite, Linux).

## **Requirements:**

- 1 years of industry or hobby-based experience or fresh graduate with strong programming background.
- Extensive experience programming in C/C++ or Java or PHP or Go
- Strong understanding of CS theory - you are able to translate theoretical concepts and academic research into practical code.
- Quick learner, problem solver, self motivated and thrive working in a flat organization. You have a habit of figuring out how something works before asking someone to explain it to you, regardless of how deep the rabbit hole goes.
- Participation in programming contests is a plus
- Experience in working with Linux/Ubuntu is a plus

## **Education:**

- BSc or higher degree in Computer Science.
- Fluent in reading, writing and speaking English.

## **How to Apply:**

Email a copy of your resume to [career@thetigerworks.com](mailto:career@thetigerworks.com).
